

**Morrish Consulting Engineers are currently looking for a Trainee Structural Technician/Engineer to join our ever growing office. We will support you in achieving your potential, providing a learning environment and supporting you in attending a part time engineering degree.**

<b>Vacancy Type:</b> Apprenticeship/Training Agreement	<b>Reporting to:</b> Managing Director/Team
<b>Hours of Work:</b> 8.45 - 17.15 Monday to Thursday 8.45 - 16.00 Friday	<b>Rate of Pay:</b> To be agreed.

### **Job Description:**

#### **Nature of the role:**

This will be a technician role progressing through to structural design engineer in parallel with further education and ambition. You will be expected to produce CAD drawings and details together with design of isolated structural members whilst providing support to the project design team.

#### **Key responsibilities:**

- General office duties
- Providing support to project engineers
- Development of structural details and designs
- Production of drawings
- Duties will vary day to day depending on work load and project type.

### **Training Description:**

#### **Training to be Provided:**

Along with in house/on the job training, Morrish Consulting Engineers will provide a training agreement by which we will support you through a part time/day release course - with the ultimate goal to achieve an engineering degree.

### **Person Specification:**

#### **Skills required:**

- Communication skills
- Time management skills
- The ability to work both independently and as part of a team
- General IT skills

### Qualifications required:

- Appropriate A-Levels/qualifications meeting entry requirements for a part time Bachelors or Masters degree associated with structural engineering as approved by Morrish Consulting Engineers.

### Personal qualities required:

- A focus and interest in construction and engineering
- A desire for a career in structural engineering
- To be dedicated and committed
- A hardworking attitude
- Good interpersonal skills
- A good sense of humour

### Additional requirements:

- A full driving licence would be beneficial.
- Experience with AutoCAD or similar systems would be of benefit, but training will be provided.

### How to apply:

In the first instance, please make contact with us via [eng@morrish.co.uk](mailto:eng@morrish.co.uk) providing your up-to-date CV and personal summary.
